Once again it's your ghetto reporter and favorite "conspiracy theorist" bringing it to you real n raw.

Sorry Mrs. Tyler but your carefully prepared statement you gave the people last week is not adding up to what the facts actually show. Your carefully prepared statement last week totally contradicts what you told the police back in '68. There are way too many inconsistencies in all the witnesses statements which is very strange because at the time all of them were supposed to be in the next room while you were supposedly getting assaulted which any black person can tell you that there is no way you're going to be beating up my family member and I'm in the next room. None of this would have probably been an issue and gotten so far out of hand if you would have simply been upfront with the people years ago, but like a politician you thought that we were just low information sheep who would vote for you simply because you were a good person.

Newsflash for you Mrs. Tyler and those who support you who are saying that your background does not matter, there are thousands of convicted felons in the city of Shreveport ( of which I believe you should be numbered among) who have committed crimes years ago but still have to deal with that background when they go to apply for a minimum wage job so I think it is very important that your background be taken into consideration when you are applying for the job of of such importance as the Mayor of the city of Shreveport.

After careful review of the facts in the police report, along with all the inconsistent statements it leads me to ask question, "Who really what was the victim that night back in 68 you are him?"
